

Material data sheet

NOVATRACE

Temperature controller with a chrono proportional action function of the ambient temperature evolution ($P=f(T_p)$).

Temperature range : from 5 to 150°C

Power range : from 5 to 99% of the total power

Maximum intensity : 16 A / 230 V

1 input 230 V / 1 proportional output 230 V / 16 A

2 LED's for control

Programmation : Rs232 protocol (Hyperterminal Windows)

Rate of power (%) and temperature maintenance (°C)

Ambiant temperature range : -40°C to +85°C

Under BJK junction box
